

# Vacuum Pumps America Inc.

## Central Vacuum Systems

Vacuum Pumps America Inc. is expert in production and manufacturing of custom made central vacuum systems. We use high quality products to manufacture central vacuum systems like:

- Single stage VPA-RS or double stage VPA-R vacuum pumps.
- Top quality ASME rated vacuum tanks made of Stainless Steel or Carbon Steel.
- Stainless steel vacuum gauge dry or liquid filled.
- Adjustable precise vacuum switch over the whole range.
- Inlet filter for vacuum pumps.
- Vacuum tank will act as a liquid collector as well and can prevent entering liquids into the vacuum pumping system. Liquid level indicators are available and will show the amount of liquid in the tank.
- Manual or solenoid valves made of stainless steel available for vacuum tank inlet, vacuum tank vent and vacuum tank drain.
  
- Motor and PLC controlled electrical panels, available at different voltages with cUL, CSA and CE approvals.
  - Single phase 110Volt, 60Hz
  - Single phase 230Volt, 50/60Hz
  - Three phase 380Volt, 50Hz
  - Three phase 208, 230, 460Volt, 60Hz
  - Three phase 575Volt, 60Hz
  
- VPA-CVS Central Vacuum Systems available in:
  - Monoplex with 1 vacuum pump, single stage or double stage mounted on vacuum tank.
  - Duplex with 2 vacuum pumps, single stage or double stage mounted on vacuum tank.
  - Triplex with 3 vacuum pumps single stage or double stage stack mount with vacuum tank at the side.
  
- ATEX  and Explosion Proof  motors with Explosion Proof Control Panels  and accessories are available for all VPA-CVS Central Vacuum Systems  upon request

### CVS-Monoplex 40GLS-31CFM

- 40 Gallon Stainless steel vacuum tank with stainless steel ball valves.
- VPA-RS31, 31CFM single stage rotary vane vacuum pump with stainless steel wash down motor single phase 110Volt, 60Hz.
- Stainless steel 0 to -30"Hg vacuum gauge with precisely adjustable vacuum switch.
